

The RSI Analysis Dashboard

— THE —
DATA
REGIMEN

Summary: The goal of this RSI Analysis Dashboard is to assist in deciding what stocks have a pullback in price and are good candidates to reverse trend based on last year's profitability and current RSI levels that measures if a stock is oversold or over brought. The report extracts from a database of close to 9000 stocks with the option to filter on stocks that are in the S&P 500.

RSI Metrics Overview: Identifies the stocks that are oversold or approaching oversold conditions. It also gives the RSI reading for the overall market in the Total Market RSI visual. This page will only return companies with a positive previous Year Net Income.

Drill Down on Ticker: Allows for a selected ticker to be identified and price data can be view for the past 3 years as well as historical RSI readings. Metrics like 52 Week High and Dip Percent will gives an overview of the magnitude of the stock's movement.

Income View: Gives a yearly view of Revenue and Net Income for a selected stock.
